

Distracted very often

*Those who know
say they do not know*

DAZIBAO#8

Those who know
say they do not know
– the scientists, about reality,
while those who do not know
claim they do
– the politics, on our existences.

Regarding those who know
they don't, but
ask for the question
– the philosophers, about truth,
they seems distracted very often,
which doesn't help us a lot.
